Technical Skills: web development, C- programming, Slide presentation, MS office, MySQL, Java, API Integration, Responsive Web Design, Frontend Development, GitHub Pages

PROJECTS

Reco-hub	08/2025 – 08/2025
Built a rating-based anime recommendation web app using HTML, CSS, and JavaScript that integrates a third-party API to fetch real-time anime data and suggest titles based on user preferences.	
Designed an interactive rating system that captures user input and dynamically generates personalized anime recommendations, improving user engagement.	
Deployed the project on GitHub Pages, demonstrating ability to independently build, test, and ship functional frontend web applications.
